

Emerging Technologies Transforming Government & Public Services

Artificial Intelligence (AI)

- Helps answer questions through chatbots.
- Speeds up paperwork and government services.
- Detects fraud and helps officials make better decisions.

Cloud Computing

- Stores government information securely online.
- Makes it easier for employees to work together.
- Reduces costs and improves access to services.

Internet of Things (IoT)

- Uses connected devices to collect real-time information.
- Improves traffic, streetlights, and public utilities.
- Helps governments fix problems before they become serious.

► Community Challenges

<u>Common Challenges</u>	<u>How Technology Helps</u>
Long wait times for services	AI speeds up services
High operating costs	Cloud computing lowers costs
Aging roads and infrastructure	IoT monitors infrastructure in real time
Fraud and security concerns	

Tech Solutions & Next Steps

Technology Solutions

- **AI:** Faster customer service
- **Cloud:** Secure information sharing
- **IoT:** Smarter cities and infrastructure

Assess Needs → Pilot Programs → Expand Successful Solutions
